DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-9, 14-18, 35-39, drawn to a fuel cell system, classified in class
 429, subclass 12.
 - II. Claims 10-13, 19-32, drawn to a power generation system, classified in class 60, subclass 204.
 - III. Claims 33, 3440, 41, drawn to a multistage combustion process, classified in class 431, subclass 7.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
